

LIGHT FIXTURE

PART NUMBER: TH-DR-FIXT

- Low Cost
- Rugged Construction
- For Grains, Powders and Solids.
- Interchangeable Lamps For UV-VIS and VIS-NIR

Light Fixture (*D) shown with Lamp (A), Lens (B) and Optical fiber (C).

Control Development, Inc. offers a light fixture that allows easy reflectance measurements of solids, powders, grains, and seeds etc... The lamp (35 Watts Tungsten Halogen with gold reflector) can be changed for different spectral regions. The pick-up lens has an adjustable field of view, allowing you to look at a very small or large area. Fiber-optic cable can be connected to any fiber input based spectrograph. The lamp module can be controlled from all Control Development spectrographs.

Control Development Inc. reserves the right to change specifications without notice.
