

Control Development, Inc.

Company Description

Control Development Inc. is a manufacturer of small, miniature, high performance spectrographs and spectroscopy systems. Our products offer an unmatched price performance combination in the industry. Our products cover the UV, VIS, and NIR spectral regions. Control Development Inc. was incorporated in 1991 and introduced its first product in 1993. Over the years, Control Development Inc. has introduced several unique products to the spectroscopy market.

Chief Spectroscopic Techniques Supported

- UV/VIS
- Raman
- Process, Quality Control, and Research Spectroscopy
- On-line and At-line Applications
- Near Infrared Reflection and Absorbance Spectroscopy
- NIR

Markets Served

- Chemical
- Petrochemical
- Biomedical
- Semiconductor
- Polymer
- Thin Films
- Telecommunications/DWDM
- Agricultural

Major Products/Services

Full line of rugged spectrographs and portable spectroscopy systems that incorporate the probe, light source, spectrograph, and software in one rugged package.

Smart Sensor

All our spectroscopy products can be integrated into industrial chassis that are Ethernet ready and can be run over a network.

Customer Support

Control Development Inc. offers extensive presale and after-sale customer support. We provide free demos of all our products. Further, we will analyze customer samples for free at our laboratory, to determine suitability of our systems to your application.

Facilities

Control Development Inc. has just moved into a new facility to accommodate its growing manufacturing requirements. The new facility is located in an industrial park in South Bend, Indiana.

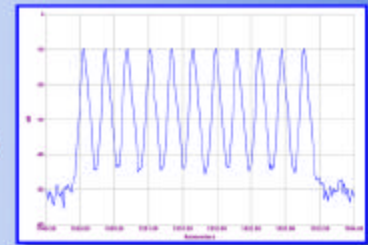

2633 Foundation Drive Tel. (574)-288-7338
