

INTERFACE KIT

Control Development's Interface Kit is a module designed to accept all CDI spectrographs for easy communication with PC computers and laptop computers by way of USB interface connection. The module can be ordered with a built-in light source and a cuvette holder. The housing is made of black anodized aluminum, with an internal power supply. The kit consists of a passive backplane with three ISA slots. In addition to the spectrograph, network cards or board level computer can be added.

Size: 12"L X 3.5"W X 7.5"H

ORDERING INFORMATION:

Part Number _____ **CDI/IF/A**

Price _____ **\$1,495.00 Base Unit with USB**

A Options _____ **LS for light source (add \$1,795.00) or
LSCUV for cuvette holder and light source
(add \$1,895.00)**

Example _____ **CDI/IF/LS**

Price _____ **\$3,290.00**
